DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-14, drawn to a self-cleaning apparatus, classified in class 604, subclass 317.
- II. Claims 15-20, drawn to a method, classified in class 134, subclass 21.

The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the self-cleaning apparatus of Group I can be used to practice another process such as inserting a material transfer hose into the cleaning fluid chamber, providing the cleaning fluid chamber with a cleaning fluid, and then activating the vacuum source.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
